EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the amendment to the specification submitted on February 28, 2005, change "10/633,904" to -10/633,806--.

2. The following is an examiner's statement of reasons for allowance: It is agreed with the applicants that Chritian et al disclose clay particles having aspect ratio from the range of 25:1 to 50:1 which is outside the scope of the aspect ratio claimed in the present claimed invention., and Beall et al fails to teach or fairly suggest the benefit of the use the composite material in an imaging material. Accordingly, it would not have been obvious to the worker of ordinary skill in the art to modify the aspect ratio of the clay taught in Christian et al using the composite material taught in Beall et al due to the lack of teaching or suggestion in Beall et al to use the composite material in an imaging element. Furthermore, none of the prior art of record teach or fairly suggest the use of slayant in both in at least one layer and the in the layered material as now being claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
